This chart displays the distribution of AR and IR cases for the end of October 2020 in Maryland. In the diagram, the middle "box" represents the middle 50% of the values. The median value for AR and IR was about 20 with no change from last month. At the end of October, the 3rd quartile represents 50% of AR and IR cases. The whiskers represent values outside the middle 50%, in which the top whiskers were around 300 for IR and 100 for AR, respectively. The max number of IR cases was 51% more than AR cases. The size of the box for AR is smaller than IR, meaning the data for AR is more similar than the data for IR.

Note: Counties uses raw data in lieu of CJAMS data. As Child Welfare get accurate data from CJAMS for all jurisdictions, the counts will be revised accordingly.

Since the COVID-19 pandemic, we may see typical cases in CPS decrease due to the impact that may affect our cases in other service areas, such as In-Home and Out-of-Home.

Since the COVID-19 pandemic, we may see typical cases in CPS decrease due to the impact that may affect our cases in other service areas, such as In-Home and Out-of-Home.
