This chart displays the distribution of AR and IR cases for the end of November 2020 in Maryland. In the diagram, the middle "box" represents the middle 50% of the values. The median value for AR and IR was about 20 with no change from last month. At the end of November, the 3rd quartile represents 50% of AR and IR cases. The whiskers represent values outside the middle 50%, in which the top whiskers were around 400 for IR and 200 for AR, respectively. The max number of IR cases was 54% more than AR cases. The size of the box for AR is smaller than IR, meaning the data for AR is more similar than the data for IR.
