MORA has helped more than 40,000 refugees make Maryland their home, aiding their transition from "displaced persons" to independent, contributing members of the national economy and the local communities. We work through a network of public and private service providers, to plan, administer, and coordinate transitional services aimed at helping refugees become self-sufficient as quickly as possible. Key areas for aiding refugees in adjusting to American life include financial assistance, job placement, community orientation, English language and vocational training, academic support for youth, case management, and other support services.

"I do appreciate the resettlement services [I received], specifically employment. They provided training on building my resume and career in the United States, networking, and connected me with a mentor in my field. These were the keys to my success in the U.S that helped me find a professional

job in my own field (engineering) in less than 90 days of my arrival. Honesty, integrity and [working hard] helped me excel at my workplace, as a result of which I completed two certifications and was promoted recently"
